

Pervertables

Introduction

'Pervertable' refers to an everyday item (such as a wooden spoon) which is perverted from its original purpose to new and improved use by us kinky types. The advantages of pervertables is that they are generally cheaper and easier to explain than say, a paddle.

Some pervertables are obvious, some not so much, hopefully you will learn to look at items you see in the store or have at home in a new light and have some fun.

What did people do before all the custom toys we know and love today were available, they took what was at hand and used it, crops, whips, hairbrushes, all just items that have seen use.

Some pervertables are usable right off the shelf, some need a bit of crafting to make them more usable, but either way, great fun can be had for just a few dollars.
